

MX Police Simply Protects Corporate Email Better.

(Ignorance is
no excuse)

Short for Mail Exchange Police, MX Police is a military-grade email security system, completely managed in our remote state-of-the-art data center. We configure, support, and monitor EVERYTHING without cumbersome installation issues or a sky-high price tag.

NOTHING BUT THE TRUTH:

- Our cutting-edge, drastically superior security engines, algorithms, and technologies detects and protect your mail system against viruses and malware, on average, **31 hours faster than the competition!**
- MX Police completely **eradicates up to 99.8% of all spam** trying to reach your business.
- Industry leading **0.000001% false positive rate** means the emails that should get through **do get through.**
- Complete management, installation, and maintenance of the system means you will **never invest in hardware, software, support, or upgrades!**
- 24/7 Availability of the your mail system with **zero downtime**, period! Our online load balancing, redundancy, and replication of data ensures that email delivery continues within seconds of encountering a problem.
- **Superior protection against other common threats**, such as denial of service and directory harvest attacks.
- Built-in failover mechanisms for your Internet connection, network hardware, and mail server to guarantee **continuous mail support** for your business.
- According to *itfacts.biz*, users without anti-spam solutions spend about 43 minutes per day checking email – With MX Police, **that time can be cut to one-fourth.**
- The estimated cost of spam due to lost productivity is \$1934 per employee every year, according to Nucleus Research. With MX Police, many users experience as much as **4,000% ROI!**

THE BOTTOM LINE:
